

# U-87 MG

## Strain Information

Cat. NO. NM-N01

Cell Line

Strain State Validation of tumorigenic capacity completed

Model Description The U-87MG cell line is human cell derived from malignant gliomas from a male patient, likely with Glioblastoma.

\*Literature published using this strain should indicate: U-87 MG cell line (Cat. NO. NM-N01) was purchased from Shanghai Model Organisms Center, Inc..

## Validation Data

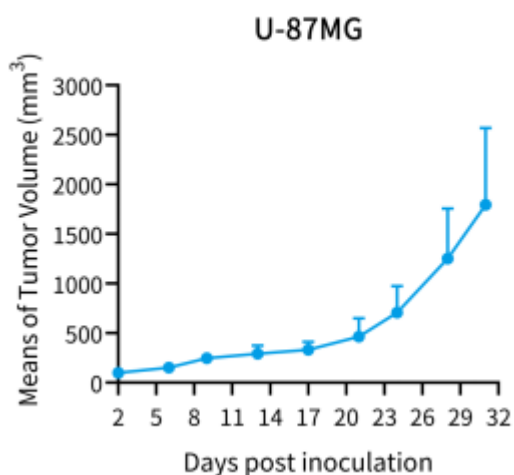

Fig.1 Tumor growth curve of U-87MG xenograft model in BALB/c Nude mice

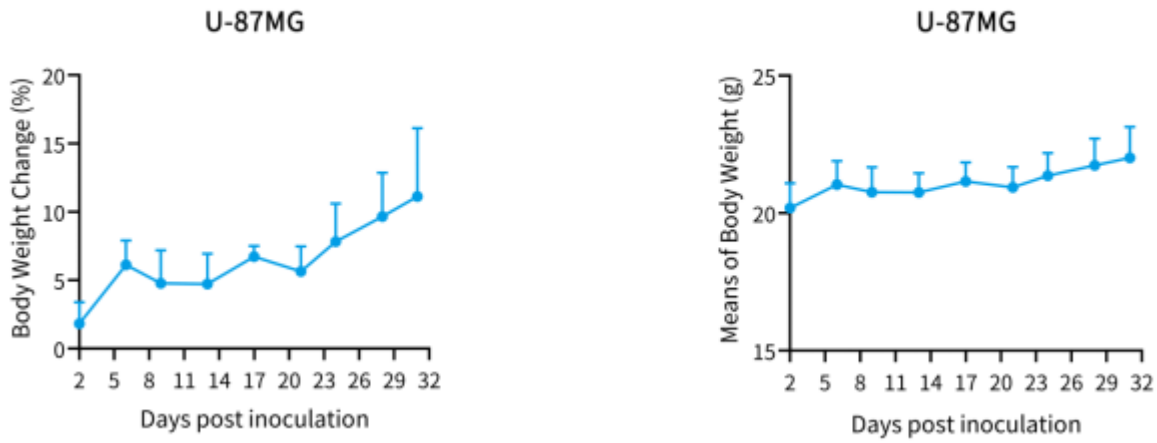

Fig.2 Body weight change of U-87MG xenograft model in BALB/c Nude mice

\*Wild-type cell lines are not for sale, and only applied to construction of tumor bearing mice and in-vivo efficacy studies.
