

Clec4b1-Flox

Nomenclature	C57BL/6Smoc- <i>Clec4b1</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Clec4b1	Synonyms	DCAR, Dcar2, Aplra2, Clec4b, DCARbeta, 1810046I24Rik
	NCBI ID	69810
	MGI ID	1917060
	Ensembl ID	ENSMUSG00000030147
	Human Ortholog	CLEC4C

Model Description

These mice carry loxP sites flanking target exons of Clec4b1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Clec4b1 gene.

*Literature published using this strain should indicate: Clec4b1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data

No data
