

Ly6a-Flox

Nomenclature	C57BL/6Smoc- <i>Ly6a</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Ly6a	Synonyms	TAP, Sca1, Sca-1, Ly-6A.2, Ly-6A/E, Ly-6E.1
	NCBI ID	110454
	MGI ID	107527
	Ensembl ID	ENSMUSG00000075602
	Human Ortholog	LY6A

Model Description

These mice carry loxP sites flanking target exons of Ly6a gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Ly6a gene.

*Literature published using this strain should indicate: Ly6a-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
