

Acan-Flox

Nomenclature	C57BL/6Smoc- <i>Acan</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Acan	Synonyms	Agc, cmd, Agc1, CSPCP, Cspg1, b2b183Clo
	NCBI ID	11595
	MGI ID	99602
	Ensembl ID	ENSMUSG00000030607
	Human Ortholog	ACAN

Model Description

These mice carry loxP sites flanking target exons of Acan gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Acan gene.

*Literature published using this strain should indicate: Acan-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data

No data
